Work Experience

Senior Full Stack Enginner at Tech Holding

Oct, 2022 - Present

Analysis, Design, Development, Implementation of new features in a condo rental software with technologies like PHP, Wordpress, Javascript, CSS and HTML.

Full Stack Enginner at FidelityApps

Aug, 2017 - Oct, 2022

I've been working creating new platforms as well as mantainig the existing software. In some projects I've been acting as **Team Leader,** by helping my coworkers to grow up their level and supporting them when they need help. In **Mobile Development,** I worked in some hybrid apps for Android & IOS with a single code in IONIC Framework.
Web Development, Full Stack development PHP Laravel, CodeIgniter, Angular, VueJS, etc for different projects in and out the company. **Servers,** I configured various Linux servers from Scratch and also some Kubernetes clusters.

Backend Developer at Protocool International

June, 2016 - Aug, 2017

Back End Developer using NodeJS language and some frameworks like SailsJs and Socket.IO for real-time communication between servers and devices. I created also and admin panel where we were able to see all the vehicles location and general info like temperature, wind, etc.

Full Stack Developer at FlexBPO

May, 2015 - May, 2016

Full Stack Developer with technologies such C#, PHP, Angular JS, CoffeeScript, HTML5 and CSS3. I created a file parser from EDI files to Qualedi files and vice versa, I also worked editing some existing modules and creating a REST API for a SugarCRM project.

Full Stack Developer at eDesarrollos

July, 2013 - Nov, 2014

Full Stack Web developer with PHP, YII Framework, HTML5, CSS3, JavaScript, AngularJS, MySQL and Postgres SQL technologies. We Designed and Developed a document management system, a files control system and an app with geolocation to private sector business. I Implemented and document a custom software development methodology based on SCRUM with YII Framework (PHP) and trello.

Education

Telematics and Computer Sysytems Engineer from Universidad de la Sierra

2009 - 2013

We learned many things here, we created many projects during the classes, one of them was a POS that was implemented in some local stores. but the most important is that we learned the basis of software development and spent valuable time with classmates. I have very good memories of those years.
